

DATA SHEET MASILLA

Ready-to-use single-component paste putty for repairing and levelling minor imperfections in the substrate and preparing the surface on the substrate and preparation of the surface for the installation of MicroQuarz. Fast drying and non-shrink, allows rapid commissioning and improves installer productivity. Excellent adhesion to non-porous substrates. Interior - exterior.

TECHICAL DATA

- **Appearance:** Paste
- **Maximum inert diameter:** 0,1 mm.
- **Bond strength (N/mm²):** >1
- **Wear resistance:** um 80
- **Impact resistance:** Nm >14,7
- **Slip resistance:** Class 1
- **Consumption:** 0.4 - 0.7 kg per coat
- **Maximum applicable thickness per layer:** 0.7 mm.
- **Trafficability:** After 8 hours

UTILITY

Repairing and cleaning of small imperfections for surface preparation and subsequent application of MicroQuarz. of MicroQuarz. It can also be used for the repair and subsequent painting or levelling of stippled walls with stippled paint.

APPLICATION

Surface preparation: The substrate must be free of irregularities, clean, free of dust and incoherent parts. incoherent parts. The substrates must be free of residual, condensation and rising damp. Cement substrates must be completely cured and free of moisture.

Preparation and application of the product: Ready to use, it is applied directly with a spatula on the surface to be levelled.

RECOMMENDATIONS TO BE TAKEN INTO ACCOUNT DURING THE APPLICATION PROCESS

It is essential to use protective glasses and gloves during the application and mixing process. mixing process. If the product comes into contact with the eyes, wash them immediately with plenty of water and seek medical advice.

WARNINGS

- Do not use the product at -5°C and +30°C.
- Do not leave the containers open for a long time.
- Do not use products that intervene in the system if they are not recommended in writing by Ecoresinas.
- Do not add water or additives to the product.
- Do not accelerate the drying process with heaters during the days after application until curing.
- Do not allow solid residues to fall into the container if the product is used again and again.

CLEANING

The tools should be cleaned with water within 30 minutes of use, after which mechanical means should be used. mechanical means should be used thereafter.

PRESENTATION

MicroQuarz Putty is available in 5 and 15kg containers.

STORAGE

At least 12 months in original containers in a dry and protected environment. temperature decreases.
